

Jellybean Graph Activity

Materials Intro: For today's activity, you will need:

- jellybean graph template
- marker
- crayons
- jellybeans (about 20-25)

Note: You can complete this activity using any item that comes in various colors or shapes.

1. Open the bag of jellybeans and sort them into piles by color
2. Create a key at the bottom of your jellybean template by shading in the different color jellybeans you have
3. Count how many jellybeans are in each pile and shade in your jellybean graph chart (*i.e.*, 6 red jellybeans = shading vertically to the number six with the red marker/crayon)
4. Count how many jellybeans you have altogether.
5. Snack on some jellybeans after you've completed all your math work! :)

Enjoy! 😊
