

Ladybug Roll and Record: Addition Activity

Materials Intro: For today's activity, you will need:

- Ladybug math template (printed on cardstock)
- Foam dice
- 1 sheet protector
- 1 dry erase marker
- 15-20 mini erasers

Note: *If you don't have counters or erasers, you can use a dry erase marker to draw on dots.*

1. First roll the dice and count how many dots you see (you might not need to count each dot and be able to recognize the number right away!)
1. Record the first number in the first box with your dry erase marker
2. Place that number of mini erasers on the left wing of the ladybug (*or draw the number of dots on the wing*)
3. Roll the dice again, count how many dots you see and write that number in the second box
4. Place that number of mini erasers in the right wing of the ladybug.
5. Count up all the erasers on both wings and find the total number of erasers!

Enjoy! 😊
